

# Balancing Progress and Responsibility

## An AI Ethics Workshop

Presented by ALX Corporate Training

### Why is this important?

Artificial intelligence has rapidly evolved from being a futuristic concept to being ingrained into our **everyday tasks**. The prolific use of these tools across organizations forces us to question whether they are as beneficial as they seem, or as the hype suggests.

The ALX AI Ethics Workshop provides organizations with insights to:

- Understand the **ethical considerations** of AI adoption
- Identify **potential risks** and challenges in ethical AI use
- Explore **responsible use** of AI in workplace practices

### Who should attend?

This workshop is designed for professionals across industries who engage with AI tools or influence AI adoption, including:

**Executives and Business Leaders**

**HR, Compliance and Legal Teams**

**Data, AI and IT Professionals**

**Product and Strategy Managers**

Whether you are new to AI or looking to deepen your understanding of ethical considerations, this workshop provides essential insights for anyone engaging with AI in a professional setting.
